Getuar Gashi

Home : Lipjan, 14000, Lipjan, Kosovo

Email: getuar.gaming@gmail.com **Phone:** (+383) 45367137

Date of birth: 09/11/2005 **Place of birth:** Lipjan **Nationality:** Kosovar

ABOUT ME

Junior Computer Science and Engineering enthusiast with a focus on web development and mobile technologies. Interested in designing modern, responsive applications and developing efficient software solutions. Eager to apply programming knowledge in real-world projects, strengthen technical skills, and explore innovative approaches to software development.

EDUCATION AND TRAINING

[2023 – Current] **Studying**

UBT College - Higher Education Institution - Computer Sciences and Engineering

City: Prishtina | **Country:** Kosovo | **Field(s) of study:** Computer Engineering

[2020 – 2023] **Graduated**

IAAP"Adem Gllavica" - Lipjan

City: Lipjan | **Country:** Kosovo

LANGUAGE SKILLS

Mother tongue(s): Albanian

Other language(s):

English

LISTENING B1 **READING** B1 **WRITING** A2

SPOKEN PRODUCTION A2 **SPOKEN INTERACTION** B1

Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user

SKILLS

HTML, CSS, JavaScript, TypeScript | React.js, Next.js, Node.js, Express.js | .NET (C#), ASP.NET, PHP, Java | MongoDB, MySQL | Git, Expo (React Native)

PROJECTS

[03/2026 – 05/2026] **UBT FindPoint**

UBT FindPoint is a robust web application developed as a university group project that enables users to discover Points of Interest using an interactive map interface. Built with **ReactNative, Node.js, and MySQL**, the platform delivers a smooth and responsive user experience for location-based exploration.

Key features include real-time search, dynamic map navigation, detailed point information, user reviews, and an intuitive interface. The project demonstrates strong full-stack development skills, effective database design, API development, frontend state management, and successful teamwork in an agile university environment.

[03/2026 – 06/2026] **Freelancer Marketplace**

Freelancer Marketplace is a comprehensive web platform developed as a university group project that connects freelancers with clients, enabling seamless project collaboration and talent discovery. Built using **React, Node.js, and MySQL**, the application provides a modern solution for showcasing skills, browsing projects, and managing collaborations.

The system includes user profiles, project posting, proposal management, real-time notifications, and secure messaging. This project showcases full-stack web development, complex database relationships, authentication systems, and effective collaborative development practices.

[03/2026 – 04/2026] **JourneySync**

JourneySync is an innovative travel planning web application created as a university group project that helps users design, organize, and synchronize their trips with friends or colleagues. Developed with **Next.js, Node.js, and MongoDB**, it offers a complete solution for itinerary management and collaborative travel planning.

Core functionalities include interactive itinerary builder, personalized travel recommendations, real-time collaboration, expense tracking, and destination discovery. The project highlights expertise in modern frontend frameworks, NoSQL databases, RESTful API development, and delivering rich collaborative features.

[11/2025 – 01/2026] **Smart Hospital System**

Smart Hospital System is a comprehensive healthcare management platform developed as a university group project to streamline hospital operations and improve patient care. Built with **React, Node.js, and MySQL**, the system provides efficient tools for patient management, appointment scheduling, and medical record maintenance.

Key features include role-based access control, digital patient records, appointment booking system, and administrative dashboards. This project demonstrates strong full-stack development capabilities, database design for sensitive data, secure authentication, and practical application of software engineering principles in the healthcare domain.

[11/2025 – 01/2026] **Restaurant Management System**

Restaurant Management System is a web application developed using **C#, ASP.NET Core MVC, Entity Framework Core, and HTML, CSS, and JavaScript**, designed to manage restaurant-related data through an organized and user-friendly interface.

The system features CRUD operations, pagination, advanced filtering and sorting, form validation, session management, and role-based access control using ASP.NET Core Identity. It also includes an admin area, REST API integration, and unit testing, demonstrating practical experience in full-stack web development, database management, authentication, and secure application design.

[03/2025 – 05/2025] **United Stadium Seat Selection**

United Stadium Seat Selection is a specialized ticket management web application developed for football stadium seat booking and event management. Created a project using **React, ASP.NET Core Web API, and MySQL**, it delivers a fast and reliable platform for managing ticket sales and seat selection.

The system features interactive seat maps, real-time availability updates, secure payment integration, booking management, and admin controls. This project showcases experience with both JavaScript and .NET ecosystems, complex state management, and building scalable ticketing solutions.

[10/2024 – 01/2025]

Course Clicker

Course Clicker is a web-based course and academic resource management system developed to help students and staff efficiently manage courses and learning materials. Built using **HTML5, CSS, JavaScript, and PHP**, this project represents an early full-stack development effort with a focus on clean design and functional backend logic.

The application enables course registration, literature management, user authentication, and content organization. It demonstrates foundational web development skills, database integration with PHP, responsive design principles, and the ability to deliver practical academic solutions.

CERTIFICATIONS

[UBT - University for Business and Technology,, 14/07/2025]

International Summer Academy of Advanced IoT, Cloud Solutions and Scalable Development

Focused on innovation, entrepreneurship, sustainability, and professional development, exploring modern ideas, emerging technologies, and solutions to real-world challenges.
